# Vroozi Purchase (Employee)

## **SMART PR - ARTIFICIAL INTELLIGENCE (AI) THAT WILL INTELLIGENTLY SCAN AND CAPTURE VROOZI PURCHASE REQUESTS FROM DOCUMENTS**

---

In this release, Vroozi developed advanced Artificial Intelligence (AI) to extract data from unstructured and semi-structured documents (eg: pdf files) in the bulk upload to create Purchase Request (PR) line items. Users will no longer need to manually create PR lines that often come from Quote, SOW, and Contract documents.

This new AI-powered feature will be accessible through the Bulk Upload functionality. Upon upload, Vroozi AI will automatically process and read the content of the document. This intelligent system is designed to analyze the document layout, identify key data fields, and extract the information, such as item description, quantity, unit price, unit of measure, and total line cost. The data successfully extracted by the AI will be automatically mapped and added as new line items directly to a Purchase Request.

Project: Evoque Mesa  
RE: Building Chilled Water  
Pressure Sensor  
To: Albert Park  
CSR Quote 12792

Control Services (CSR) is submitting this emergency repair workorder for work to that was performed on 11-22-22 at the Evoque Data Center located at 1301 W University Dr, Mesa AZ 85201.

**Narrative**

There was very low system pressure in the chilled water piping in the Central Plant resulting in near loss of flow and causing the pumps to cycle.

**Scope**

Control Services determined that more makeup water needed to be added to increase the system pressure. While troubleshooting the issue, it was determined that a clogged WYE Strainer along with a leaking ball valve needed to be replaced and were.

Control Services also added a pressure sensor in the piping and connected it into the BMS for monitoring, notification and alarm reporting for facilities personnel. Pressure gauges were also added in the piping for visual indication as none were existing.

**Included** – Site Labor.

**Excluded** – Permits, Taxes and Bond.

**Price \$4,822.00**

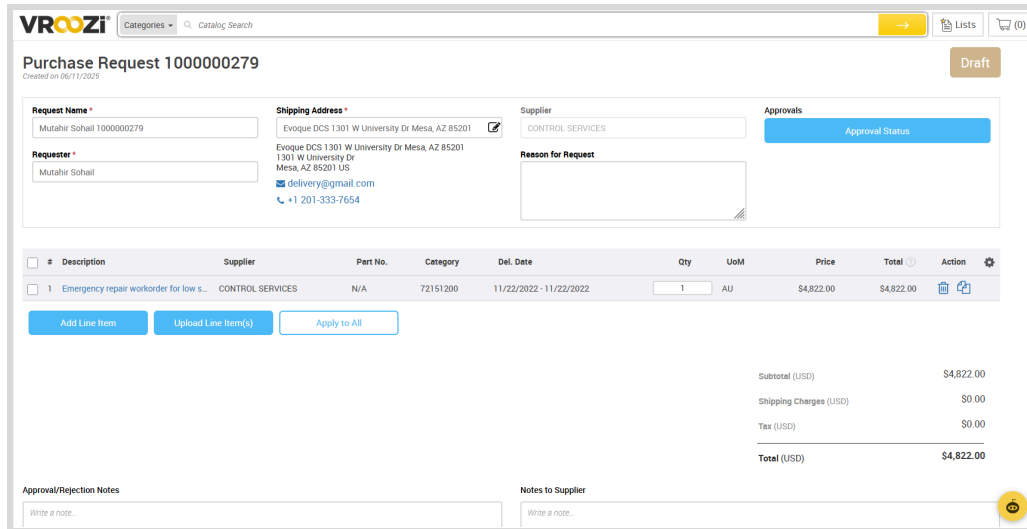

**Four Thousand Eight Hundred Twenty-Two Dollars**

Quote is Valid for 30 Days

Sincerely,  
Christopher Vasold

***PURCHASE REQUEST AFTER INTELLIGENT SCAN AND CAPTURE***

This feature will be available upon additional subscription, please contact [success@vroozi.com](mailto:success@vroozi.com) to subscribe to this feature.

## Vroozi Invoice (Admin, AP Manager, AP Processor, AP Approver, AP Coder, AP Auditor)

### UPGRADED SEARCH ENGINE FOR FASTER SEARCH & IMPROVED PERFORMANCE ON TRACK INVOICES PAGES

We upgraded the search engine to improve the performance of all Track Invoices pages. This enhancement will return results more quickly and load invoice lists much faster. Users will notice faster page loading, quicker free-text searches, and smoother navigation.

## Vroozi API

### ATTACHMENT SUPPORT FOR PURCHASE ORDER GET REQUESTS

Purchase Order API (GET) responses will now include attachments. When a PO is linked to a PR that contains attachments, those files will automatically be included in the PO payload.

## **FETCH MULTIPLE PURCHASE ORDERS IN A SINGLE REQUEST**

---

This enhancement improves efficiency and flexibility when retrieving POs for integrations or reporting. The API now allows fetching multiple Purchase Orders in a single request using any combination of the following query parameters, while still supporting all existing filters:

- **ids**: Internal PO IDs
- **externalIds**: External system identifiers
- **orderNumbers**: Human-readable PO/order numbers

## **Resolutions**

- “Federal Tax ID” will now update for Supplier Master and Supplier Discovery records when changes are made through a bulk upload file.
- The Vroozzi Invoice Hopper Inbox will now sync normally regardless of any user local computer time changes. All valid emails will appear as expected.
- Supplier Account Number will now appear on the Invoice even though it was correctly configured.
- “Plant” will no longer appear in the line item column preferences when it is set to hidden in Document Settings.
- Accounting Information will no longer appear in the column preferences and line item grid within the Supplier Portal.
